

AmendmentAmendment to Claims

Please amend the claims as shown below and cancel claim 5.

1. (Currently amended) A method of loading a music player with music, comprising:

requesting a requested music file from an automobile; and
receiving a requested music file through a wireless communication from
another automobile.

2. (Original) The method of claim 1, further comprising storing the requested music file into non-volatile memory.

3. (Original) The method of claim 2, wherein storing the requested music file includes storing the requested music file in a flash memory array.

4. (Original) The method of claim 1, further comprising loading the requested music file onto a database coupled to an internet service provider.

5. (Cancelled) The method of claim 1, further comprising requesting the requested music file while in an automobile.

6. (Currently amended) The method of claim [5] 1, further comprising receiving a request with a receiver coupled to the other [another] automobile.

7. (Currently amended) The method of claim 1, further comprising transmitting the requested music file from the other [an] automobile.

8. (Original) The method of claim 1, further comprising transmitting the requested music file from a computer.

9. (Original) The method of claim 1, further comprising receiving a Bluetooth™ communication comprising at least a portion of the requested music file.

10. (Original) The method of claim 1, further comprising receiving a cellular communication comprising at least a portion of the requested music file.

11. (Currently amended) An apparatus comprising:

a receiver adapted to receive a wireless communication from a first automobile to a second automobile; and

a storage medium, wherein the apparatus is adapted to store a requested music file received by the receiver.

12. (Original) The apparatus of claim 11, wherein the receiver is adapted to receive a Bluetooth™ communication.

13. (Original) The apparatus of claim 11, wherein the storage medium comprises flash memory.

14. (Original) The apparatus of claim 11, wherein the apparatus is adapted to play the requested music file.

15. (Original) The apparatus of claim 11, wherein the apparatus is further adapted to request the requested music file from a peer-to-peer network.

16. (Currently amended) A method comprising:

requesting a music file through a first wireless communication from a first automobile;

receiving at least a portion of the music file through a second wireless communication from a second automobile; and

storing at least a portion of the music file in a non-volatile memory.

17. (Original) The method of claim 16, further comprising playing the music file.

18. (Previously amended) The method of claim 16, further comprising storing the music file in a database coupled to a wireless communications network, wherein receiving at least a portion of the music file includes receiving at least a portion of the music file from the database.

19. The method of claim 18, further comprising transferring the database from a computer to a server, the server being coupled to the wireless communications network.

20. The method of claim 16, wherein requesting a music file includes requesting a music file from a peer-to-peer network.
